

The screenshot displays the PyTorch website's 'Files' section. It features a table with columns: Version, Operating System, Description, MD5 Sum, File Size, CPU, and Signature. The table lists various PyTorch versions (1.10.0, 1.9.0, 1.8.0, 1.7.1, 1.6.0, 1.5.1, 1.4.1, 1.3.1, 1.2.0, 1.1.0, 1.0.1, 1.0.0) and their corresponding download links for different operating systems (Linux, macOS, Windows). Below the table is a navigation bar with links: About, Downloads, Documentation, Community, Success Stories, and News. At the bottom, there is a terminal window showing the command 'python3 --help' and its output, which includes information about the PyTorch version (1.10.0) and the command to run the help command.
